

Service Catalog

Practice Offerings, Deliverables, and Indicative Pricing — Version 4.2 (Effective March 2026)

Introduction

This catalog describes CRCG's standard service offerings across its four practice areas. Offerings are designed to be combined into multi-phase programs; many of CRCG's largest engagements (e.g., the Helios Energy Digital Transformation program) span several offerings delivered sequentially over multiple fiscal years. Pricing shown is indicative list pricing for a typical mid-market engagement and is subject to scope-specific adjustment in the proposal and Statement of Work (SOW) process; published rates in this catalog supersede any pricing referenced in proposals older than 12 months.

Operations Excellence

OE-100 — Operating Model Diagnostic

Practice: Operations Excellence | **Typical Duration:** 4–6 weeks | **Typical Team Size:** 2–4 consultants | **Indicative Fee Range:** \$80,000 – \$160,000

A rapid current-state assessment of a business unit or plant operating model, benchmarking process maturity, throughput, and cost-to-serve against CRCG's internal database of over 90 prior engagements.

Key deliverables:

- Current-state process maps for top 5 value streams
- Operating model maturity scorecard (CRCG's proprietary 6-dimension framework)
- Quick-win opportunity list with estimated annualized savings
- Executive readout deck and prioritized roadmap

OE-210 — Plant Floor Digitization

Practice: Operations Excellence | **Typical Duration:** 6–9 months | **Typical Team Size:** 4–7 consultants | **Indicative Fee Range:** \$650,000 – \$1,400,000

End-to-end digitization of manual plant-floor processes, including sensor/IoT deployment planning, MES (Manufacturing Execution System) selection support, and change management for shop-floor supervisors. This offering formed the basis of CRCG's engagement with Atlas Manufacturing Co. beginning in 2022.

Key deliverables:

- Digitization roadmap and technology selection shortlist
- Pilot line implementation and hypercare support
- Supervisor and operator training curriculum
- Post-pilot ROI validation report

OE-330 — Supply Chain Resilience Assessment

Practice: Operations Excellence | **Typical Duration:** 8–12 weeks | **Typical Team Size:** 3–5 consultants | **Indicative Fee Range:** \$300,000 – \$480,000

A structured assessment of supply chain single points of failure, supplier concentration risk, and inventory buffering strategy, typically commissioned following a disruption event or as part of annual enterprise risk planning.

Key deliverables:

- Supplier concentration and tier-2 mapping analysis
- Disruption scenario stress-testing (minimum 4 scenarios)
- Inventory and dual-sourcing recommendations
- Resilience scorecard with 12-month re-assessment cadence

Digital & Analytics

DA-150 — Data Strategy & Governance Foundation

Practice: Digital & Analytics | **Typical Duration:** 10–14 weeks | **Typical Team Size:** 3–5 consultants | **Indicative Fee Range:** \$350,000 – \$600,000

Establishes a client's enterprise data strategy, including governance model, data quality standards, and a prioritized roadmap for analytics use cases.

Key deliverables:

- Data governance operating model and RACI
- Data quality baseline assessment across priority domains
- Use-case prioritization matrix (value vs. feasibility)
- 18-month analytics capability roadmap

DA-260 — Interoperability & Integration Program

Practice: Digital & Analytics | **Typical Duration:** 9–16 months | **Typical Team Size:** 6–10 consultants | **Indicative Fee Range:** \$1,800,000 – \$3,200,000

Large-scale system interoperability programs, frequently used in healthcare settings to connect EHR, claims, and ancillary clinical systems under HL7 FHIR or equivalent standards. This was the foundation of the NovaHealth Clinical Data Interoperability Program (PRJ-2245).

Key deliverables:

- Interoperability architecture and standards adoption plan
- API/interface build and testing (volume per SOW)
- Data quality remediation workstream
- Production cutover and 90-day hypercare

DA-410 — Predictive Analytics & Digital Twin Build

Practice: Digital & Analytics | **Typical Duration:** 5–9 months | **Typical Team Size:** 4–6 consultants | **Indicative Fee Range:** \$550,000 – \$2,200,000

Custom predictive model development (e.g., predictive maintenance, demand forecasting) or digital twin construction for physical assets, including model validation and MLOps hand-off.

Key deliverables:

- Model design document and feature engineering plan
- Trained and validated model with documented accuracy benchmarks
- Production deployment and monitoring dashboard
- Model governance and retraining playbook

Risk & Compliance

RC-120 — Operational Risk Controls Uplift

Practice: Risk & Compliance | **Typical Duration:** 6–11 months | **Typical Team Size:** 3–6 consultants | **Indicative Fee Range:** \$650,000 – \$1,100,000

Designed for regulated entities (banking, insurance) needing to remediate control gaps identified through internal audit or regulatory examination.

Key deliverables:

- Control gap assessment against regulatory framework
- Remediated control design documentation
- Testing evidence packages for examiner review
- Control owner training and sustainment plan

RC-205 — Regulatory Readiness Review

Practice: Risk & Compliance | **Typical Duration:** 4–8 weeks | **Typical Team Size:** 2–4 consultants | **Indicative Fee Range:** \$180,000 – \$340,000

A focused pre-examination or pre-audit review to identify and close gaps before a known regulatory event.

Key deliverables:

- Gap assessment against applicable regulation/standard
- Prioritized remediation backlog
- Mock examination / audit simulation session

People & Change

PC-140 — Change Management & Adoption Program

Practice: People & Change | **Typical Duration:** Concurrent with host program | **Typical Team Size:** 1–3 consultants | **Indicative Fee Range:** Typically bundled (10–15% of host program fee)

Embedded change management support delivered alongside a host technology or process transformation program; not typically sold standalone.

Key deliverables:

- Stakeholder impact and readiness assessment
- Communications and training plan
- Adoption metrics dashboard
- Resistance management playbook

PC-260 — Organizational Design & Workforce Transition

Practice: People & Change | **Typical Duration:** 8–14 weeks | **Typical Team Size:** 2–4 consultants | **Indicative Fee Range:** \$250,000 – \$500,000

Org structure redesign accompanying major operating model or technology change, including role definition, span-of-control analysis, and workforce transition planning.

Key deliverables:

- Future-state org design and job architecture
- Span-of-control and layer analysis
- Workforce transition and redeployment plan

Pricing Notes

All indicative fee ranges in this catalog are quoted in USD and exclude reimbursable travel expenses, which are billed at cost per CRCG's Travel & Expense Policy. Engagements with a Canadian or UK delivery component may incur currency conversion adjustments; see Finance & Controller guidance for current FX policy. Multi-year programs (such as Digital Transformation programs exceeding 12 months) are typically priced per-phase rather than as a single fixed fee, and phase 2+ pricing is subject to re-scoping based on phase 1 findings — see, for example, the revised Phase 2 budget in the Helios Energy engagement documentation, which differs from the original Phase 2 proposal estimate.
