

Customer Feedback & Testimonials

Compiled Post-Engagement Survey Results and Client Quotes — FY2024–FY2025

Survey Methodology

CRCG administers a structured post-engagement survey to the client executive sponsor and, where applicable, a sample of end-users within 30 days of program close-out. Survey results feed the firm's Client NPS KPI (see KPIs tab of CRCG_Finance_KPIs.xlsx). Quotes below are reproduced with client permission; some have been lightly edited for length.

Atlas Manufacturing Co.

Marguerite Doyle, COO | Score: 10/10

“CRCG didn't just hand us a dashboard and leave. They sat on the floor with our supervisors for two months until the new way of working actually stuck.”

NovaHealth Systems

Dr. Felix Amato, CIO | Score: 9/10

“We went into this thinking we needed to rip out and replace four EHRs. CRCG showed us we didn't — we needed better plumbing between them.”

Brightline Retail Group

Janelle Ruiz, VP Operations | Score: 8/10

“The supply chain work gave us the map. The forecasting pilot gave us the engine. There were some bumps getting the forecasting model right, but the team was transparent about it the whole way through.”

Helios Energy Partners

Owen Bracewell, VP Digital | Score: 8/10 (Phase 1 close-out)

“The digital twin roadmap gave our leadership team a credible, sequenced plan instead of a vague vision statement. We're now relying on that same team for Phase 2.”

Meridian Trust Bank

Linda Okwu, Director of Operational Risk | Score: 9/10

“Grant and Tobias understood examiner expectations better than some of our own staff did. The evidence packages they helped us build were accepted without a single follow-up question.”

Aggregate Survey Results, FY2024 vs FY2025

Survey Dimension	FY2024 Avg Score (1-10)	FY2025 Avg Score (1-10)
Overall Satisfaction	8.4	8.7
Would Recommend CRCG	8.6	9.0
Delivered on Time	7.1	7.4
Delivered on Budget	6.9	7.0
Knowledge Transfer Quality	8.0	8.5
Team Responsiveness	8.9	9.1

Note: "Delivered on Budget" remains the lowest-scoring survey dimension across both years, consistent with the budget variances documented across several case studies and the Financial Summary FY2025 (notably the NovaHealth interoperability program and Brightline forecasting pilot cost overruns). This has been flagged by the Internal Practice Leads Sync as an area for continued focus heading into FY2026.
